

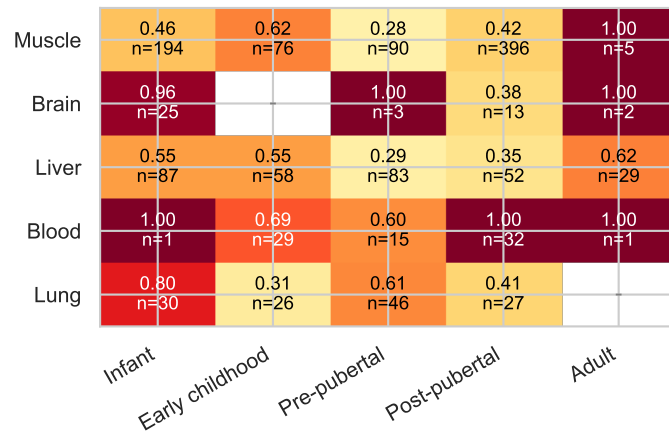

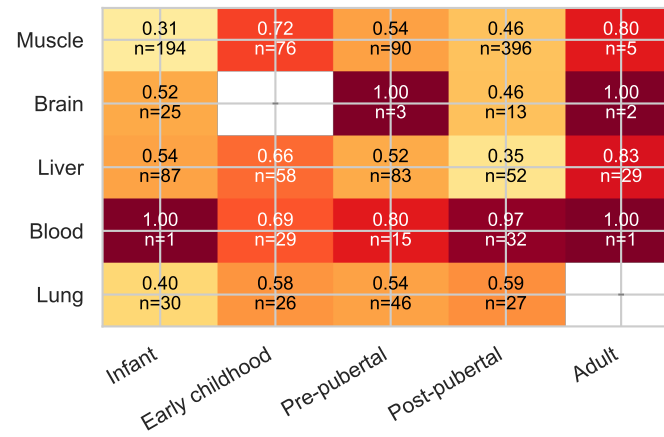

Figure S8 - Within-stage subgroup heterogeneity and its effect on per-tissue classifier performance

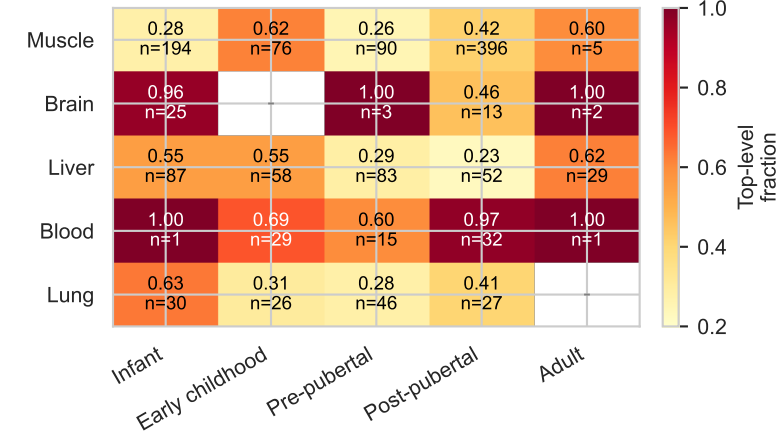

(a1) Dominance: Breed

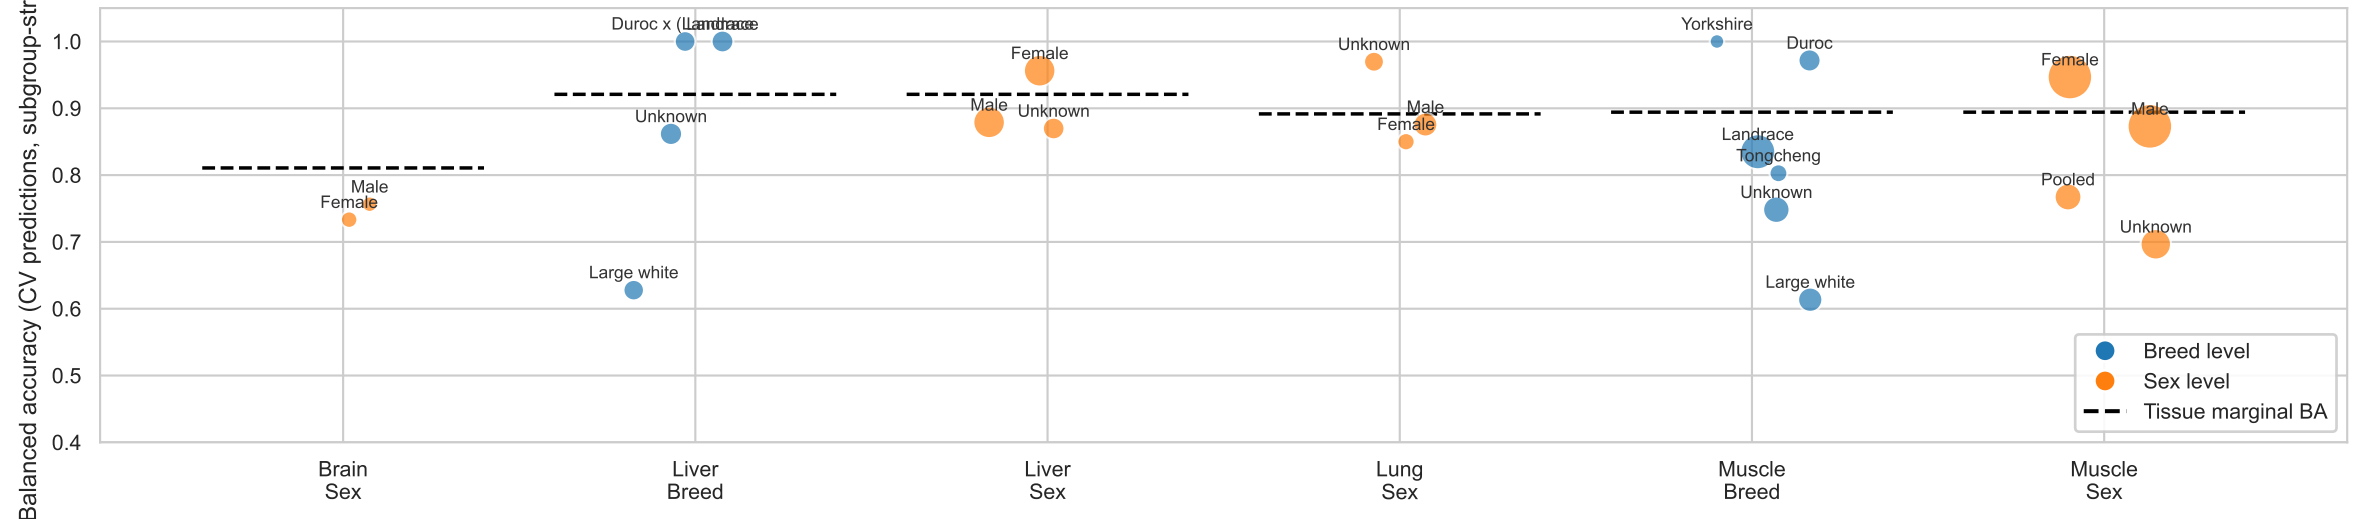

(a2) Dominance: Sex

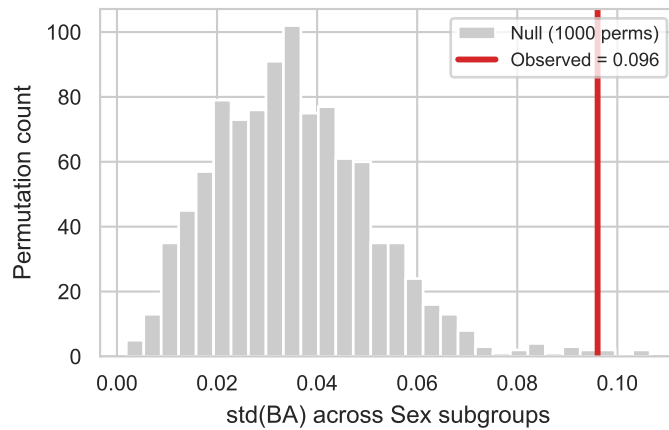

(a3) Dominance: BioProject

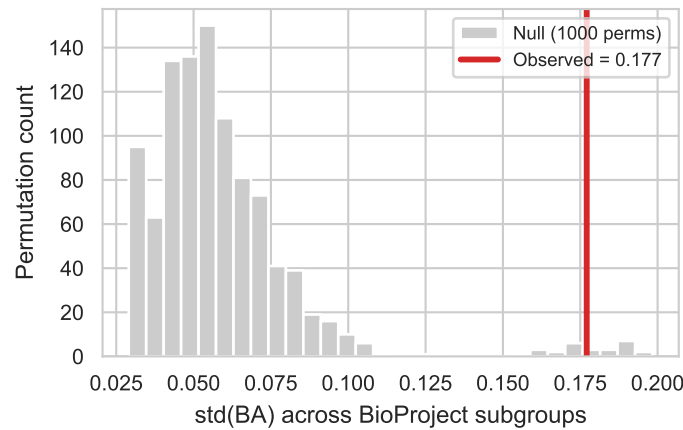

(b) Subgroup performance vs. marginal BA (dashed black). Point size scales with n.

(c) Muscle / Sex: permutation p = 0.004

(d) Muscle / BioProject: p = 0.014

(e) Liver / Breed: p = 0.007
